The Company is duly registered with the Comisión Nacional de Mercado de Valores in Spain under number 886.

Background

iShares VII public limited company (the "Company") is organised as an open-ended Investment Company with variable capital. The Company was incorporated in Ireland on 9 April 2009 with limited liability and segregated liability between its Funds and is organised under the laws of Ireland as a Public Limited Company ("PLC") pursuant to the Companies Act 2014 (as amended) and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the "UCITS Regulations") and is regulated by the Central Bank of Ireland ("CBI").

The term "Fund" shall be deemed to mean either a fund of the Company, or if the context so requires, the Manager or its delegate acting for the account of the relevant Fund. The term "BlackRock" is used to represent BlackRock Advisors (UK) Limited. The investment objectives and policies of each Fund are set out in the prospectus.

The Company is structured as an umbrella Fund and comprises separate Funds ("Funds") of the Company. Each Fund of the Company comprises a distinct portfolio of investments. The shares of each Fund may be issued with different rights, features and on different terms and conditions to those of other Funds. Shares of a Fund may be divided into different share classes with different dividend policies, currency hedging and valuation currencies and may therefore have different fees and expenses. A currency hedged share class is a share class of a Fund which allows the use of hedging transactions to reduce the effect of exchange rate fluctuations. Unhedged share classes are also available to investors. The Company may issue currency hedged share classes in Funds that are not currency hedged Funds. Currency hedged Funds are identified on the Fund details table on page 5 and 6.

While assets and liabilities that are specific to a share class within a Fund would be attributable to (and should be borne by) only that share class, there is no segregation of liabilities between share classes as a matter of Irish law. Due to the lack of segregation of liabilities as a matter of law, there is a risk that the creditors of a share class may bring a claim against the assets of the Fund notionally allocated to other share classes. The financial instruments and risks section of the financial statements provides more details on the management of foreign currency risk in relation to the currency hedged share classes.

The Investment Manager may use derivatives (for example, forward currency contracts and futures contracts, or such other instruments as are permitted) to hedge the rate of exchange between the currency of all or some of the currencies in which the assets of a Fund (including cash and income) are denominated and the share class valuation currencies.

The transactions, costs and related liabilities and benefits arising from instruments entered into for the purposes of hedging the currency exposure for the benefit of any particular currency hedged share classes shall be attributed only to the relevant currency hedged share classes. Currency exposures of different share classes may not be combined or offset and currency exposures of the assets of a Fund may not be allocated to separate share classes.

Changes to the Company

A new share class was launched on the following Fund during the financial period as detailed in the below table:

| Fund | Share Class | Launch Date |
|------------------------------|------------------|------------------|
| iShares NASDAQ 100 UCITS ETF | EUR Hedged (Acc) | 7 September 2018 |

On 22 November 2018, an updated prospectus was issued by the Company to incorporate the following changes:

• iShares FTSE 100 UCITS ETF changed name to iShares Core FTSE 100 UCITS ETF GBP (Acc).

- · iShares MSCI EMU UCITS ETF changed name to iShares Core MSCI EMU UCITS ETF.
- iShares MSCI Japan UCITS ETF USD (Acc) changed name to iShares MSCI Japan UCITS ETF.

Teresa O'Flynn resigned as a non-executive Director on 30 November 2018.

Effective 10 December 2018, the registered address of the Manager was updated to 1st Floor, 2 Ballsbridge Park, Ballsbridge, Dublin 4, D04 YW83, Ireland.

Effective 10 December 2018, the registered office address was updated to 200 Capital Dock, 79 Sir John Rogerson's Quay, Dublin 2, D02 RK57, Ireland.

On 31 December 2018, PricewaterhouseCoopers resigned as independent auditors of the Company and Deloitte Ireland LLP were appointed.

Background (continued)

Potential Implications of Brexit

In the referendum held on 23 June 2016 the United Kingdom ("UK") voted to leave the European Union ("EU") following which a continued period of political and economic instability and volatility in the financial markets of the UK and more broadly across Europe has prevailed.

BlackRock is implementing a number of steps to prepare for various outcomes, including effecting organisational, governance and operational changes, applying for and receiving licenses and permissions in the EU, and engaging in client communications. Depending on the terms of the UK's exit from the EU, BlackRock may experience organisational and operational challenges, incur additional costs or face other execution risks in connection with its European operations post-Brexit.

As the withdrawal date, 29 March 2019, stated within the UK's Article 50 declaration approaches the legal default of the UK leaving without a deal, and no transitional period, remains the default and the likelihood of an alternate outcome remains unclear.

Recent Parliamentary votes have supported a desire to extend Article 50 to ensure that the UK does not leave the EU without a deal, however without a change to legislation the default position remains.

Fund details

There were 30 Funds in operation at 31 January 2019. The investment objective of the Funds is to provide investors with a total return, taking into account the capital and income returns, which reflect the total returns of the respective benchmark listed in the table below and overleaf:

| Fund | Benchmark Index | Investment Management Approach* |
|--|--|---------------------------------------|
| iShares \$ Treasury Bond 1-3yr UCITS ETF USD (Acc) B | ICE U.S. Treasury 1-3 Year Bond Index | Non-Replicating |
| iShares \$ Treasury Bond 3-7yr UCITS ETF | ICE U.S. Treasury 3-7 Year Bond Index | Non-Replicating |
| iShares \$ Treasury Bond 7-10yr UCITS ETF USD (Acc) | ICE U.S. Treasury 7-10 Year Bond Index | Non-Replicating |

| iShares Nikkei 225 UCITS ETF | Nikkei 225 Index | Replicating |

*Please refer to the Investment Manager's report for further information on replicating and non-replicating Funds. ^Currency hedged Fund.

All figures relating to each Fund/Share Class are shown in the relevant functional currency. The financial statements of the Company are presented in Euro. These Funds are Exchange Traded Funds ("ETFs"), which provide the flexibility of a share with the diversification of a Fund. They can be bought and sold like any other share listed on a stock exchange, but provide instant exposure to many companies or various financial instruments relevant to the Fund and its benchmark index.

Stock exchange listings

The Company maintained a listing on the London Stock Exchange ("LSE").

Investment Manager's report

INVESTMENT OBJECTIVE

The investment objective of the Funds is to provide investors with a total return, taking into account the capital and income returns, which reflect the total returns of the respective benchmark listed in Fund details in the Background section.

FUND PERFORMANCE AND TRACKING ERROR

The Fund performance figures are the aggregated net monthly returns based on the NAV calculated in accordance with the prospectus for the financial period under review. The returns are net of the Total Expense Ratio ("TER").

Realised tracking error is the annualised standard deviation of the difference in monthly returns between a Fund and its benchmark index. Tracking error shows the consistency of the returns relative to the benchmark index over a defined period of time. Tracking error is based on the NAV calculated in accordance with the prospectus.

Anticipated tracking error is based on the expected volatility of differences between the returns of a Fund and the returns of its benchmark index.

For physically replicating Funds, the investment management approach is to buy a portfolio of securities that as far as practicable consist of the securities that make up the benchmark index, in similar proportion to the weights represented in the benchmark index.

For non-replicating Funds, the investment management approach aims to match the main risk characteristics of the benchmark index by investing in a portfolio that is primarily made up of securities that represent the benchmark index. The objective is to generate a return which is as close as practicable to the total return of the index net of transaction costs, gross of fees and other costs.

Cash management, efficient portfolio management techniques including securities lending, transaction costs from rebalancing and currency hedging can have an impact on tracking error as well as the return differential between a Fund and its benchmark index. Importantly, these impacts can be either positive or negative depending on the underlying circumstances.

Each Fund's TER is accrued on a daily basis throughout the financial period, which can impact the measurement of a tracking error in a positive or negative manner depending on the performance in the market and the TER rate applied. The extent and magnitude of this effect on performance measurement is subject to the timing of the market performance relative to the performance period and can be greater than the headline TER in a positive market and lower than the TER in a negative market.

In addition to the above, the Funds may also have a tracking error due to withholding tax suffered by the Funds on any income received from its investments. The level and quantum of tracking error arising due to withholding taxes depends on various factors such as any reclaims filed on behalf of the Funds with various tax authorities, any benefits obtained by the Funds under a tax treaty or any securities lending activities carried out by the Funds.

The following table compares the realised performance of the Funds against the performance of the relevant benchmark index during the financial period ended 31 January 2019 and the anticipated tracking error of the Funds (disclosed in the prospectus on an ex-ante basis) against the actual realised tracking error of the Funds as at 31 January 2019. The realised tracking error is annualised and calculated using data from the preceding 36 month observation period. Where a Fund has not been trading for 36 months, the annualised tracking error since inception has been presented.

| Fund | Fund return for the financial period ended 31/01/2019 % | Benchmark return for the financial period ended 31/01/2019 % | Anticipated tracking error % | Realised tracking error % |
|--|--|---|---------------------------------------|------------------------------------|
| iShares \$ Treasury Bond 1-3yr UCITS ETF USD (Acc) B | 1.72 | 1.80 | Up to 0.150 | 0.02 |
| iShares \$ Treasury Bond 3-7yr UCITS ETF | 3.20 | 3.26 | Up to 0.150 | 0.04 |

| iShares Nikkei 225 UCITS ETF | (7.29) | (7.15) | Up to 0.200 | 1.19 |

The fund performance is quoted as the sum of daily dividend rates, net of fees. Due to accounting policy requirements under Irish generally accepted accounting practice ("Irish GAAP"), which apply to the financial statements, there may be slight differences between the net asset value ("NAV") per share as recorded in the financial statements, and the NAV per share as calculated in accordance with the valuation methodology as set out in the prospectus. Details of the difference between the NAV as calculated in accordance with the valuation methodology as set out in the prospectus and the NAV as per the financial statements is set out in the notes to the accounts.

The performance data does not take any commissions and costs incurred in connection with the issue and redemption of shares into account.

Past performance may not necessarily be repeated and future performance may vary.

The performance and tracking error returns are for the primary share class for each Fund, which has been selected as a representative share class. Performance returns for other share classes are available at www.ishares.com.

MARKET REVIEW Equities

US equities

This market review summary covers iShares Core S&P 500 UCITS ETF, iShares Dow Jones Industrial Average UCITS ETF, iShares MSCI USA Small Cap UCITS ETF, iShares MSCI USA UCITS ETF and iShares NASDAQ 100 UCITS ETF.

US equities lost ground over the Company's six month review period but nevertheless outperformed compared to broader global equities. The relatively strong performance of the US economy and optimism that the Federal Reserve (the "Fed") could slow or even end the succession of interest rate rises helped to insulate US equities from concerns over the global economic outlook as US-China trade tensions rose.

US stocks began the six month period on a firm footing, largely reflecting signs that the US economic environment was becoming increasingly robust. Even with global trade tension mounting as President Donald Trump toughened his stance over broadening import tariffs on Chinese goods, a series of positive corporate trading updates, notably from the IT and healthcare sectors, underpinned US equities. Meanwhile, confirmation that the US economy had expanded by 4.20% on an annualised basis during the second quarter of 2018, the best quarterly performance since 2014, lent further support to US equities, even as the Fed raised borrowing costs by 0.25% in September. However, US markets led their global counterparts sharply lower in October, reflecting a combination of factors, including valuation concerns in the IT sector following mixed trading updates from companies such as Alphabet, worries that US interest rate rises were creating headwinds to global economic growth and mounting European political uncertainties. Having staged a limited recovery during November amid rising optimism over the potential for looming negotiations to ease US-China trade tensions and the prospect that slower global growth forecasts could prompt a rethink from the Fed over interest rates, US equities ended 2018 on a soft note. Notwithstanding optimism that the Fed's December 0.25% interest rate hike, taking borrowing costs to 2.50%, could represent the top of the tightening cycle, signs of a Chinese led slowdown in global growth and a domestic political wrangle over the US budget that resulted in a partial government shutdown weighed on US equities. Nevertheless, the market staged a partial recovery in January, reflecting signs that the US economic backdrop remained resilient and hopes that negotiations could help to solve the US-China trade disagreement.

Small caps underperformed their larger counterparts over the review period, partly reflecting some reduction in investors' appetite for risk. The IT heavy NASDAQ index also underperformed the wider market, weighed by disappointing trading updates from several leading IT companies, including Apple and Nvidia. The Dow Jones Industrial Average posted only a modest decline, outperforming broader US equities, underpinned by greater relative exposure to some outperforming industrials and lower exposure to some underperforming IT companies.

Japanese equities

This market review summary covers iShares MSCI Japan UCITS ETF and iShares Nikkei 225 UCITS ETF.

Japanese equities produced poor returns over the review period, underperforming compared to global equities. Concerns over the potential impact of global trade tensions, the effects of renewed strength in the Japanese Yen on corporate earnings and unease over the faltering domestic economic recovery weighed on the Japanese market over the period.

The Japanese market began the review period on a mixed note amid rising concerns that US-China trade tension could potentially create new barriers to exports from Japan to the US. Nevertheless, news that improved levels of domestic consumption had helped the Japanese economy to grow by 0.50% during the second quarter, bouncing back from a surprise -0.20% contraction during the January to March period, helped to underpin market sentiment. A decline in the Japanese currency against the US Dollar, which benefitted from growing confidence that robust US economic data would convince the Fed to continue to raise interest rates, also helped to boost export orientated Japanese companies. Subsequently second quarter economic growth would be revised up to 0.70%. However, the Japanese market followed its global peers sharply lower in October as deepening unease over the US-China trade dispute, fears over the potential for further US interest rates, some mixed global corporate earnings updates and political uncertainty in Europe weighed heavily on investors' risk appetite. Although global equities would subsequently stabilise amid hopes that the Fed could moderate or even reverse their policy tightening in 2019, worries returned over the health of Japan's domestic economy. Albeit impaired by a series of natural disasters, including an extreme heatwave, the Hokkaido earthquake and Typhoon Jebi, the Japanese economy contracted by -0.60% during the third quarter. Meanwhile, with the Fed's rhetoric suggesting a more patient approach over interest rate policy in the face of headwinds to global economic growth, a rally in the Japanese Yen against the softer US Dollar looked set to adversely affect Japanese companies' revenues from sales in the US market. Although a rebound in global equities during January, partly influenced by optimism over US-China trade talks, helped the Japanese market to rally, Japanese stocks nevertheless lagged behind their overseas peers during the final weeks of the review period. This reflected the concerns that extended China's economic slowdown is already weighing on demand for Japanese goods, particularly in the wake of disappointing December export data.

MARKET REVIEW (continued) Equities (continued)

Japanese equities (continued)

Following early declines relative to the US Dollar, the Japanese Yen subsequently strengthened, ending firmer against the US currency over the review period as a whole. Nikkei 225 equities, which have greater relative exposure to IT stocks, underperformed the broader market, as represented by the MSCI Japan index.

European equities

This market review summary covers iShares Core EURO STOXX 50 UCITS ETF, iShares FTSE MIB UCITS ETF EUR (Acc), iShares MSCI EMU CHF Hedged UCITS ETF, iShares MSCI EMU Small Cap UCITS ETF, iShares Core MSCI EMU UCITS ETF and iShares MSCI EMU USD Hedged UCITS ETF (Acc).

European equities struggled during the review period, underperforming their global peers by a substantial margin. A combination of concerns over the effects of the US-China trade disagreement and political uncertainties in several European countries, notably Italy, weighed to a large extent on the region's stock markets over the six months.

European bourses fared poorly early in the review period, reflecting concerns that rising global trade tensions could act as headwinds to European exporters. Heightened political uncertainties in Italy also added to the sense of unease as the country's Five Star/Lega coalition government maintained its anti-EU rhetoric. Meanwhile, worries over European banks' exposure to Turkey further unnerved some investors as the Turkish Lira's plunge put borrowers with foreign currency exposure under pressure. Signs that the Eurozone economic backdrop was continuing to soften acted as further headwinds to European equities. Following the tragic loss of life from collapse of the Morandi road bridge near Genoa, the Italian government announced its intention to increase infrastructure spending and would subsequently propose a budget that clashed with EU deficit rules. Having fallen sharply alongside their global peers in early October amid worries related to trade tensions and the effects of rising US interest rates, European equities lagged behind the subsequent recovery in global equities. Although the Italian government would eventually reach a compromise with the EU over its budget, political factors elsewhere continued to weigh on European equities. Following another disappointing performance in German regional elections, Angela Merkel agreed to stand down as German Chancellor, albeit not until 2021, while the growing prospect that the UK could leave the EU in late March without a formal withdrawal agreement added to the sense of uncertainty. With the Eurozone economy already showing signs of cooling, with growth slipping from 0.40% during the second quarter to just 0.20% during the July to September period, the prospect of a disorderly Brexit further weighed on Eurozone business confidence late in the review period. Even as global equities staged a limited recovery in January amid hopes of a reduction in US-China trade tensions, Eurozone equities ended the period on a relatively weak note. This partly reflected unease that, following confirmation that the Italian economy had slipped into recession at the end of 2018, trade headwinds could see the export orientated German economy shrink for the second successive quarter. These concerns lingered during the final week of the review period as provisional data suggested that fourth quarter growth across the Eurozone remained subdued at just 0.20%.

European small caps underperformed their larger counterparts, reflecting risk averse global investors' broad preference for large caps amid growing doubts over the prospects for the world economy. Political factors weighed on the performance of Italian equities relative to their broader European counterparts, albeit that some easing of budget related worries limited the extent of the underperformance late in the review period. Although Swiss Franc hedged equities broadly matched the returns from unhedged exposure to European stocks, the US Dollar's net gain over the period resulted in underperformance by US Dollar hedged exposure.

UK equities

This market review summary covers iShares Core FTSE 100 UCITS ETF GBP (Acc), iShares MSCI UK Small Cap UCITS ETF and iShares MSCI UK UCITS ETF.

UK equities underperformed compared to global equities over the review period, reflecting a combination of lingering uncertainty over the outcome of Brexit negotiations and signs that the domestic economy's resilience could finally be weakening. Despite the lack of clarity over the UK's future trading relationship with the EU, the UK's largest blue chip companies performed broadly in line with the wider market, with Sterling's weakness against the US Dollar set to boost revenues derived from international operations. However, smaller UK companies underperformed compared to their larger peers, reflecting global investors' increasingly cautious approach towards companies regarded as higher risk.

MARKET REVIEW (continued) Equities (continued)

UK equities (continued)

UK equities began the review period on a disappointing note, faring poorly relative to their global counterparts over much of August and September. Although investors had largely discounted the Bank of England's decision to raise interest rates by 0.25% to 0.75%, some mixed corporate news flow weighed on sentiment towards the UK market, with trading updates from several retailers suggesting that consumers were increasingly shopping online rather than on the High Street. Although UK equities would largely follow the sharp downturn and modest subsequent recovery in global equities in October and November as investors assessed the outlook for US interest rates and the prospect of escalating US-China trade tensions, Brexit related concerns continued to overshadow the UK market. Even as the robust employment market, with the unemployment rate easing to a 43 year low of 3.90%, helped to lift average earnings, consumer and business sentiment remained very subdued. Although official data showed that economic growth had climbed from 0.40% during the second guarter to 0.60% during the July to September period, sentiment based surveys suggested that the outlook for growth was cooling, including in the dominant services sector. With Brent crude oil prices plunging from three year highs of \$86 in early October, subsequently dipping to nearly \$50 in late December, the UK's relatively large energy sector added to downward pressure on the market. Political factors took centre stage in around the turn of the calendar year, initially as Prime Minister Theresa May won a no confidence vote that ensured her status as Conservative party leader for another year, then as the House of Commons rejected the EU Withdrawal Agreement that the government had negotiated with the EU. Nevertheless, with doubts growing as to whether the government could secure the revised terms demanded by Parliament, Brexit related uncertainty continued to dominate sentiment during the final weeks of the review period. Against this backdrop, subdued consumer spending and business investment data continued to highlight concerns over the UK's future trading relationship with the EU.

Canadian equities

This market review summary covers iShares MSCI Canada UCITS ETF.

Canadian equities marginally underperformed relative to their global counterparts over the review period. Despite optimism that a revised trade agreement with the US would enable Canadian exporters to continue to capitalise on demand from the robust US economy, concerns that the ongoing trade friction between the US and China was weighing on the latter's demand for raw materials, coupled with the dramatic fourth quarter slide in oil prices, acted as a headwind to the resource rich Canadian market.

The Canadian market produced largely flat returns early in the review period. Although robust domestic economic data helped the US market to move moderately higher even as trade tensions with China rose, concerns that the dispute was creating headwinds to global economic growth weighed to some extent on the Canadian market. Nevertheless, investors drew some reassurance from data showing that the economy had grown by 0.70% during the second quarter, its strongest quarterly growth in a year, and due largely to higher levels of household spending and exports of energy and pharmaceuticals. Although news that protracted talks between Canada, the US and Mexico over revised North American Free Trade Agreement ("NAFTA") terms had finally delivered the new United States-Mexico-Canada Agreement ("USMCA") deal at the end of September, Canadian equities nevertheless fell sharply alongside global equities in October as investors fretted over trade tensions and the extent of US interest rate rises. Meanwhile, the Bank of Canada raised interest rates from 1.50% to 1.75%, citing reduced economic uncertainty following the USMCA deal, also warning that, given the strong economy, further rises should be expected as policymakers sought to keep inflation close to the 2.00% target. Given the strong representation of energy stocks in the Canadian market, the slide in oil prices over the fourth quarter as a whole weighed disproportionately on Canadian equities. Meanwhile, news that economic growth had slipped to a disappointing 0.30% during the third quarter, partly due to some cooling in household spending, also weighed on sentiment. Although the Canadian market bounced back strongly in January, reflecting optimism that US-China trade talks could pave way for a lowering of tensions that could potentially bolster demand for Canadian resources, Canadian equities nevertheless slightly underperformed relative to global stock markets over the period as a whole.

Emerging market equities

This market review summary covers iShares Core MSCI Pacific ex-Japan UCITS ETF, iShares MSCI Brazil UCITS ETF USD (Acc), iShares MSCI EM Asia UCITS ETF, iShares MSCI Korea UCITS ETF USD (Acc), iShares MSCI Mexico Capped UCITS ETF and iShares MSCI Russia ADR/GDR UCITS ETF.

Emerging market equities produced resilient returns, outperforming their broader global equities over the six month period. Notwithstanding the soft tone of global equities and concerns over China's ongoing economic slowdown, optimism that talks between the US and China could resolve the trade dispute and signs that the Fed is becoming more vigilant to the effects of US interest rises represented a more supportive backdrop for emerging market equities late in the review period. In regional terms, Latin American markets fared particularly well as political developments in Brazil were well received by investors.

MARKET REVIEW (continued) Equities (continued)

Emerging market equities (continued)

Emerging market equities, particularly Asia Pacific stocks, moved lower early in the review period, largely reflecting escalating US-China trade tension as President Donald Trump, having imposed import tariffs on \$50 billion of goods earlier in the year, levied tariffs on a further \$200 billion worth of Chinese imports. Meanwhile, following mixed survey data from China, official figures would later confirm that year on year economic growth had slipped from 6.80% and 6.70% during the first and second quarters of 2018 respectively to 6.50% during the third quarter, prompting concern that the ongoing slowdown would act as a drag on trading activity across other emerging economies. Extreme currency weakness in Argentina and Turkey, partly reflecting the side effects of steady rises in US interest rates, also weighed on sentiment towards some emerging markets. Although Brazilian equities felt the effects of currency weakness, relief over the revised NAFTA/USMCA trade deal offset some uncertainties over incoming Mexican President Andrés Manuel López Obrador's policies towards business, while the resource rich Russian market benefited from rising energy prices.

Having fallen sharply amid broad weakness in global stock markets in October, emerging market equities benefitted from a gradual improvement in sentiment into the turn of the calendar year. Brazilian equities soared into year-end as right wing candidate Jair Bolsonaro clinched a decisive Brazilian presidential election victory, a result that was widely interpreted as positive for business. Meanwhile, notwithstanding subdued Chinese economic indicators, optimism over the potential for a breakthrough during January's US-China trade talks and signs that the Fed was prepared to adopt a more patient approach over US interest rate rises also lent support to emerging markets, helping to extend their outperformance over global equities during the final weeks of the review period. Benefitting from improved sentiment towards global microchip stocks around the turn of the calendar year, the Korean market performed relatively well over the review period. The Russian market ended the review period higher as optimism over the domestic economic outlook offset weakness in the energy sector as oil prices tumbled in October. Although Latin American equities ended the period higher, there were significant performance disparities; Brazilian equities rose sharply on optimism that the new government would implement pro-business policies, although Mexican equities lost ground amid concerns over the new president's economic agenda.

Fixed Income

US Government Bonds

This market review summary covers iShares \$ Treasury Bond 1-3yr UCITS ETF USD (Acc) B, iShares \$ Treasury Bond 3-7yr UCITS ETF and iShares \$ Treasury Bond 7-10yr UCITS ETF USD (Acc).

The US government bond market rallied over the Company's review period, rising marginally ahead of broader highly rated global government bonds of similar maturities. The gains reflected signs that headwinds to world economic growth could be building and optimism that more subdued US inflationary pressures could offer additional scope for the Fed to pause, or potentially even begin to reverse, the succession of interest rate rises implemented over the previous two years. Over the review period longer dated US Treasuries outperformed their shorter dated counterparts, reflecting the perception that the US rising interest rate cycle could be at, or close to, its peak, while the cooling outlook for economic growth and inflation further highlighted the appeal of longer dated bonds.

US government bond prices began the review period on a positive note. Despite the encouraging tone of US economic data, rising US-China trade tensions drove demand for ultra low risk government bonds. However, sentiment softened in September amid speculation that the pressure for further rises in US interest rates was building as US economic data became increasingly robust. Despite the decline in inflation from 2.90% in July to 2.70% in August, with September's figure subsequently dropping to just 2.30%, second quarter economic growth was confirmed at 4.20% on an annualised basis, the strongest growth since the third quarter of 2014. Nevertheless, even as provisional data released in October suggested third economic growth of a stronger than expected 3.50%, US Treasury bond markets rallied significantly over the fourth quarter, with 10 year yields tumbling from a 7 year peak of 3.22% in early October to a low of 2.69% in late December. Initially spurred by safe haven buying amid the dramatic falls in global equities, Treasury bond prices subsequently found additional support from the slide in global energy prices as investors reassessed the demand/supply outlook. Although third quarter growth was revised down to 3.40% and inflation slid further, subsequently dipping as low as 1.90%, with domestic economic indicators remaining buoyant, the Fed raised interest rates to 2.50% in December. Nevertheless, amid a partial shutdown of the federal government over a political budget dispute and ongoing international trade tensions clouding the global economic outlook, optimism that the Fed would adopt a more cautious approach to interest rate policy lent support to US Treasury bonds even as global equities rallied sharply during the final weeks of the review period.

MARKET REVIEW (continued) Fixed Income (continued)

European Government Bonds

This market review summary covers iShares € Govt Bond 1-3yr UCITS ETF EUR (Acc), iShares € Govt Bond 3-7yr UCITS ETF and iShares € Govt Bond 7-10yr UCITS ETF EUR (Acc).

Euro denominated government bond markets generated small price gains over the six month period, largely matching the gains from their global government bond counterparts of similar maturities. Despite rising political risks pushing Italian bond yields higher and the end of the European Central Bank's ("ECB") €2.5 trillion bond buying quantitative easing ("QE") programme in December, evidence that the Eurozone economic backdrop was softening and the dramatic fourth quarter slide in global equities underlined the safe haven appeal of European government debt. Longer dated bonds outperformed their shorter dated counterparts over the review period, reflecting the perception that the softening economic environment extended the timeframe for any possible move from the ECB towards higher interest rates.

Euro government bond markets had a relatively flat start to the review period as ongoing signs of cooling in the Eurozone economy and buying of safe haven assets in response to global trade tension was largely offset by unease over above target inflation. Compared to just 1.10% in February, Eurozone inflation hit 2.10% in July and would subsequently peak at 2.20% in October, partly due to the strength in energy prices. However, a surge in Italian 10 year government bond yields, to around 3.60% in October, compared to 2.85% in early August and just 1.80% as recently as May, reflected worries that Italy's anti EU coalition government was set to challenge EU deficit rules in its forthcoming budget. Notwithstanding worries related to Italy, confirmation that Eurozone economic growth had eased to just 0.20% during the third quarter, compared to 0.40% during the first two quarters of 2018, lent support to Eurozone government debt markets.

Nevertheless, ECB President Mario Draghi confirmed in late November that the central bank's massive QE programme would finally come to an end in December, even in the face of softer Eurozone economic data. Subsequently, following the Italian government's compromise with the EU over its budget, a significant slide in Italian bond yields in November and December, ultimately to a low of 2.60% in late January, helped to drive the rally in wider Eurozone government bond markets. A marked decline in inflation, which would fall as low as 1.40% in January, and news that Eurozone economic growth had held at just 0.20% during the final quarter of 2018, further underpinned Eurozone government bond prices during the final weeks of the review period.

NOTES TO THE FINANCIAL STATEMENTS

For the financial period ended 31 January 2019

1. COMPANY DETAILS

iShares VII public limited company is organised as an open-ended Investment Company with variable capital. The Company was incorporated in Ireland on 9 April 2009 with limited liability and segregated liability between its Funds and is organised under the laws of Ireland as a Public Limited Company ("PLC") pursuant to the Companies Act 2014 (as amended) and the UCITS Regulations and is regulated by the CBI.

The registered office of the Company is J.P Morgan, 200 Capital Dock, 79 Sir John Rogerson's Quay, Dublin 2, D02 RK57, Ireland.

2. SIGNIFICANT ACCOUNTING POLICIES

Statement of compliance

The financial statements of the Company are prepared in accordance with FRS 104 and Irish statute pursuant to the Companies Act 2014 (as amended) and the provisions of the UCITS Regulations. Accounting standards generally accepted in Ireland in preparing financial statements which present a true and fair view are promulgated and issued by the Financial Reporting Council ("FRC").

Due to the special nature of the Company's business, the Directors have adapted the arrangement and headings and sub-headings of the financial statements otherwise required by Schedule 3 to the Companies Act 2014 (as amended).

All amounts are rounded to the nearest thousand, unless otherwise stated.

The principal accounting policies and estimation techniques are consistent with those applied to the previous annual financial statements.

3. FINANCIAL INSTRUMENT AND RISKS

Introduction and overview

The Company's investment activities expose it to the various types of risk which are associated with the financial instruments and markets in which it invests. The following information is not intended to be a comprehensive summary of all risks and investors should refer to the prospectus for a more detailed discussion of the risks inherent in investing in the Company.

Risk management framework

The principal risks and uncertainties of the Company and related risk management policies are consistent with those disclosed in the Company's audited financial statements as at and for the financial year ended 31 July 2018.

The Directors of the Company consider the following risks to be the principal risks and uncertainties facing the Company for the financial period:

a) Market risk

Market risk arises mainly from uncertainty about future values of financial instruments influenced by other price, currency and interest rate movements. It represents the potential loss the Funds may suffer through holding market positions in the face of market movements.

i) Market risk arising from foreign currency risk

Exposure to foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

The Funds may invest in securities, which as far as possible and practicable, consist of the component securities of the benchmark index of each Fund, and which may be denominated in currencies other than its reporting currency.

The Funds, with the exception of the currency hedged Funds (as listed in the background section), in line with their benchmarks, are unhedged and are therefore exposed to foreign currency risk. Consequently, each Fund is exposed to the risk of currency fluctuations between the base currency of the benchmark index and the base currency of the constituent securities of the benchmark index.

For the financial period ended 31 January 2019

3. FINANCIAL INSTRUMENT AND RISKS (continued)

a) Market risk (continued)

i) Market risk arising from foreign currency risk (continued)

Exposure to foreign currency risk (continued)

In addition, certain Funds may have share classes which have different valuation currencies from the base currency of the Fund. Consequently, the investments of a share class may be acquired in currencies which are not the valuation currency of the share class. Currency hedged share classes use a currency hedging approach whereby the hedge is proportionately adjusted for net subscriptions and redemptions in the relevant currency hedged share class. An adjustment is made to the hedge to account for the price movements of the underlying securities held for the relevant currency hedged share class, however, the hedge will only be reset or adjusted on a monthly basis and as and when a pre-determined tolerance is triggered intra-month, and not whenever there is market movement in the underlying securities. In the event that, the over-hedged or under-hedged position on any single underlying portfolio currency exposure of a currency hedged share class exceeds the pre-determined tolerance as at the close of a Business Day (for example, due to market movement), the hedge in respect of that underlying currency will be reset on the next Business Day (on which the relevant currency markets are open). Over-hedged positions shall not exceed 105% of the NAV of the relevant currency hedged share class that is to be hedged against currency risk. As a result of this currency hedging approach, the currency hedged share classes are considered to be immaterially exposed to foreign currency risk.

Currency hedged share classes, where offered in a Fund, aim to reduce the impact of exchange rate fluctuations between the underlying portfolio currency exposures of the Fund and the valuation currency of the currency hedged share class on returns of the relevant benchmark index to investors in that share class, through entering into foreign exchange contracts for currency hedging.

The realised or unrealised gains or losses relating to these forward currency contracts are allocated to the relevant share class. The details of such contracts are disclosed as hedged forwards in the relevant Fund's schedule of investments.

The Funds may also invest in forward currency contracts and thus gain further exposure to foreign currency risk.

Management of foreign currency risk

To minimise this risk, the currency hedged Funds invest in forward currency contracts that as far as possible track the hedging methodology of the benchmark index. The benchmark index of the currency hedged Funds are designed to represent a close approximation of the return that can be achieved by hedging the currency exposures of the index in the one month forward market at the end of each month.

Exchange rate exposures are managed where appropriate and in compliance with the prospectus utilising forward currency contracts. The details of the contracts in place at the financial period-end date are disclosed in the schedules of investments.

The Investment Manager will monitor the currency exposure and gain or loss arising from hedge positions of each currency hedged share class against the pre-determined tolerances daily and will determine when a currency hedge should be reset and the gain or loss arising from the forward currency contracts reinvested or settled, while taking into consideration the frequency and associated transaction and reinvestment costs of resetting the forward currency contracts.

ii) Market risk arising from other price risk

Exposure to other price risk

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting similar financial instruments traded in the market.

The Funds are exposed to market risk arising by virtue of their investments in equities, ETF's, warrants, rights, bonds, futures contracts and forward currency contracts.

The movements in the prices of these investments result in movements in the performance of the Funds. The investment concentrations within the portfolio are disclosed in the schedules of investments by investment type.

Management of other price risk

The Investment Manager manages the Funds' market risk on a daily basis in accordance with the Funds' investment objective. The investment objective of the Funds is to provide investors with a total return, taking into account the capital and income returns, which reflect the total returns of the respective benchmark.

For the financial period ended 31 January 2019

3. FINANCIAL INSTRUMENT AND RISKS (continued)

a) Market risk (continued)

ii) Market risk arising from other price risk (continued)

Management of other price risk (continued)

The Fund's performance is correlated to its benchmark. The correlation of the Fund's performance against the benchmark is a metric monitored by key management personnel.

iii) Market risk arising from interest rate risk

Exposure to interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Funds are exposed to interest rate risk through their cash and cash equivalent holdings including margin cash held with brokers. The Funds are also exposed to interest rate risk through their investments in bonds, where the value of these securities may fluctuate as a result of a change in interest rates.

The Funds also have indirect exposure to interest rate risk through their investments into futures contracts, whereby the value of the underlying asset may fluctuate as a result of a change in interest rates.

Management of interest rate risk

Movements in the prices of these investments are derived from movements in market interest rates and issuer creditworthiness.

Issuer creditworthiness and credit spreads are monitored by the Investment Manager regularly. The securities in which the Funds invest will generally have a minimum rating of "investment grade" (Investment grade securities are those issued by an entity with a minimum investment grade credit rating from at least one globally recognised credit rating agency; Standard & Poor's, Moody's or Fitch) from a ratings agency as set out in the investment policy of the Funds.

b) Counterparty credit risk

Exposure to counterparty credit risk

Counterparty credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

The Funds are exposed to counterparty credit risk from the parties with which they trade and will bear the risk of settlement default.

Management of counterparty credit risk

Counterparty credit risk is monitored and managed by BlackRock's Risk and Quantitative Analysis ("RQA") Counterparty & Concentration Risk Team. The team is headed by BlackRock's Chief Counterparty Credit Officer who reports to the Global Head of RQA. Credit authority resides with the Chief Counterparty Credit Officer and selected team members to whom specific credit authority has been delegated.

As such, counterparty approvals may be granted by the Chief Counterparty Credit Officer, or by identified RQA Credit Risk Officers who have been formally delegated authority by the Chief Counterparty Credit Officer.

The BlackRock RQA Counterparty & Concentration Risk Team completes a formal review of each new counterparty, monitors and reviews all approved counterparties on an ongoing basis and maintains an active oversight of counterparty exposures and the collateral management process.

There were no past due or impaired balances in relation to transactions with counterparties as at 31 January 2019 or 31 July 2018.

i) Financial derivative instruments

The Funds' holdings in exchange traded futures contracts and over-the-counter ("OTC") financial derivative instruments exposes the Funds to counterparty credit risk.

For the financial period ended 31 January 2019

3. FINANCIAL INSTRUMENT AND RISKS (continued)

- b) Counterparty credit risk (continued)
- i) Financial derivative instruments (continued)

Management of counterparty credit risk related to exchange traded financial derivative instruments

Exchange traded financial derivative instruments

The exposure to futures contracts is limited by trading the contracts through a clearing house. The Funds' exposure to counterparty credit risk on contracts in which it currently has a gain position is reduced by such gains received in cash from the counterparty under the daily mark-to-market mechanism on exchange traded futures contracts (variation margin).

The Funds' exposure to credit risk on contracts in which it currently have a loss position is equal to the amount of margin posted to the counterparty which has not been transferred to the exchange under the daily mark-to-market mechanism.

The margin is paid or received on futures contracts to cover any exposure by the counterparty or the Funds to each other. "Margin cash account" on the condensed balance sheet consists of margin receivable from or payable to the Fund's clearing brokers and various counterparties.

Management of counterparty credit risk related to OTC financial derivative instruments

The Funds' holdings in OTC financial derivative instruments exposes the Funds to counterparty credit risk.

Counterparty credit risk in relation to OTC financial derivative instruments arises from the failure of the counterparty to perform according to the terms of the contract. The Funds exposure to counterparty credit risk is limited to the contracts in which it currently has a financial asset position reduced by any collateral received from the counterparty, or to counterparties who have received collateral from the Funds.

All OTC derivative transactions are entered into by the Funds under an International Swaps and Derivatives Associations, Inc. Master Agreement ("ISDA Master Agreement") or similar agreement. An ISDA Master Agreement is a bilateral agreement between the Funds and a counterparty that governs OTC derivative transactions entered into by the parties.

The parties' exposures under the ISDA Master Agreement are netted and collateralised together, therefore any collateral disclosures provided are in respect of all OTC derivative transactions entered into by the Funds under the ISDA Master agreement. All non-cash collateral received/posted by the Funds under the ISDA Master Agreement is transferred bilaterally under a title transfer arrangement.

The carrying value of financial assets together with cash held with counterparties best represents the Fund's gross maximum exposure to counterparty credit risk at the reporting date, before including the effect of ISDA Master Agreements and close-out netting, which reduces the overall counterparty credit risk exposure. Cash held as security by the counterparty to derivative contracts is subject to the credit risk of the counterparty.

The Funds' maximum exposure to counterparty credit risk from holding forward currency contracts will be equal to the notional amount of the currency and any net unrealised gains as disclosed in the relevant Fund's schedules of investments.

Forward currency contracts do not require variation margins and thus the counterparty credit risk is monitored through the BlackRock RQA Counterparty & Concentration Risk Team who monitor the creditworthiness of the counterparty. The counterparties for forward currency contracts are disclosed in the relevant schedules of investments.

ii) Depositary

The Funds' Depositary is State Street Custodial Services (Ireland) Limited (the "Depositary"). The majority of the investments are held by the Depositary at financial period end. Investments are segregated from the assets of the Depositary, with ownership rights remaining with the Funds.

Bankruptcy or insolvency of the Depositary may cause the Funds' rights with respect to its investments held by the Depositary to be delayed or limited. The maximum exposure to this risk is the amount of long investments disclosed in the schedules of investments.

The Depositary has appointed State Street Bank and Trust Company (the "Sub-Custodian") as its global Sub-Custodian. Substantially all of the cash of the Company is held with the Sub-Custodian.

The Funds' cash balances are held by the Sub-Custodian in its account together with its own cash balances and with those cash balances that are held on behalf of other clients. The Funds' cash balances are separately identifiable within the records of the Sub-Custodian.

For the financial period ended 31 January 2019

3. FINANCIAL INSTRUMENT AND RISKS (continued)

b) Counterparty credit risk (continued)

ii) Depositary (continued)

In respect of the cash held by the Sub-Custodian or other depositaries it appoints, the Funds will be exposed to counterparty credit risk of the Sub-Custodian or those depositaries. In the event of the insolvency or bankruptcy of the Sub-Custodian or other depositaries, the Funds will be treated as a general creditor of the Sub-Custodian or the depositaries.

Management of counterparty credit risk related to the Depositary

To mitigate the Funds' exposure to the Depositary, the Investment Manager employs specific procedures to ensure that the Depositary is a reputable institution and that the counterparty credit risk is acceptable to the Funds. The Funds only transact with Depositary's that are regulated entities subject to prudential supervision, or with "high credit ratings" assigned by international credit rating agencies.

The long term credit rating of the parent company of the Depositary and Sub-Custodian, State Street Corporation, as at 31 January 2019 is A (31 July 2018: A) (Standard and Poor's rating).

In order to further mitigate the Fund's counterparty credit risk exposure to the Sub-Custodian or depositary banks, the Funds may enter into additional arrangements such as the placing of residual cash in a money market fund for example Institutional Cash Series Plc ("ICS") shown as a cash equivalent on the condensed balance sheet. ICS is a BlackRock umbrella fund and an open-ended Investment Company with variable capital incorporated in Ireland and having segregated liability between its funds. ICS is a UCITS.

iii) Counterparties

All transactions in listed securities are settled/paid for upon delivery using approved brokers. The risk of default is considered minimal, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The trade will fail if either party fails to meet its obligation.

Counterparty credit risk arising on transactions with brokers relates to transactions awaiting settlement. Risk relating to unsettled transactions is considered small due to the short settlement period involved and the high credit quality of the brokers used.

Management of counterparty credit risk related to counterparties

RQA monitors the credit rating and financial position of the brokers used to further mitigate this risk.

iv) Securities lending

The Funds that engage in securities lending activities expose such Funds to counterparty credit risk. The maximum exposure to each Fund is equal to the value of the securities loaned. Securities lending transactions entered into by the Funds are subject to a written legal agreement between the Funds and the Securities Lending Agent, BlackRock Advisors (UK) Limited, a related party to the Company, and separately between the Securities Lending Agent and the approved borrowing counterparty.

Collateral received in exchange for securities lent is transferred under a title transfer arrangement and is delivered to and held in an account with a tri-party collateral manager in the name of the Depositary on behalf of the Funds. Collateral received is segregated from the assets belonging to the Funds' Depositary or the Lending Agent.

Management of counterparty credit risk related to securities lending

To mitigate this risk, the Funds which undertake securities lending transactions receive either cash or securities as collateral equal to a certain percentage in excess of the fair value of the securities loaned.

The Investment Manager monitors the fair value of the securities loaned and additional collateral is obtained, if necessary. As at the condensed balance sheet date, all non-cash collateral received consists of securities admitted to or dealt on a regulated market.

The Funds also benefit from a borrower default indemnity provided by BlackRock Inc. The indemnity allows for full replacement of securities lent. BlackRock Inc. bears the cost of indemnification against borrower default.

c) Issuer credit risk related to debt securities

Issuer credit risk is the default risk of one of the issuers of any securities held by the Funds. Bonds or other debt securities involve credit risk to the issuer which may be evidenced by the issuer's credit rating.

For the financial period ended 31 January 2019

3. FINANCIAL INSTRUMENT AND RISKS (continued)

c) Issuer credit risk related to debt securities (continued)

Securities which are subordinated and/or have a lower credit rating are generally considered to have a higher credit risk and a greater possibility of default than more highly rated. A number of the Funds invest into sovereign and corporate debt. This exposes the Funds to the risk that the issuer of the bonds may default on interest or principal payments.

Management of issuer credit risk related to debt securities

To manage this risk, the Investment Manager invests in a wide range of debt securities, subject to the investment objectives of each Fund and monitors the credit ratings of the investments as disclosed in the schedules of investments. The ratings of the debt securities are continually monitored by the BlackRock Portfolio Management Group ("PMG").

d) Liquidity risk

Exposure to liquidity risk

Liquidity risk is the risk that the Funds will encounter difficulties in meeting their obligations associated with financial liabilities.

Liquidity risk to the Funds arises from the redemption requests of investors and the liquidity of the underlying investments the Funds are invested in. The Funds' shareholders may redeem their shares on the close of any daily dealing deadline for cash equal to a proportionate share of the Funds' NAV.

The Funds are therefore potentially exposed to the liquidity risk of meeting the shareholders' redemptions and may need to sell assets at prevailing market prices to meet liquidity demands. It is also exposed to the liquidity risk of daily margin calls on derivatives.

Management of liquidity risk

Liquidity risk is minimised by holding sufficient liquid investments which can be readily realised to meet liquidity demands.

To manage this risk, if redemption requests on any dealing day amount to shares representing 10% or more of the NAV of a Fund, the Manager may, in its discretion, refuse to redeem any shares representing in excess of 10% (at any time including after the cut-off time on the dealing day).

Any request for redemptions on such dealing day shall be reduced rateably and the redemption requests shall be treated as if they were received on each subsequent dealing day until all shares to which the original request related have been redeemed.

In any event settlement for redemptions will normally be made within ten days of the dealing day.

The Funds benefit from the ETF creation and redemption process which, through the use of Authorised Participants, benefit from economies of scale and access to market participants with a visible market presence and a driver of large trading volumes. Investors and the Funds benefit from the ETF creation and redemption process, which allows an investor, through Authorised Participants, to create and redeem a large number of shares, therefore giving them access to significant market depth. This helps to mitigate liquidity risk and investor concentration risks for the Funds and mitigates investor concentration risks given that the Authorised Participants either receive the assets directly from the Fund on redemption, or for the minority of Funds a fee is charged to cover trading costs.

e) Valuation of financial instruments

The Funds classify financial instruments measured at fair value using a fair value hierarchy. The fair value hierarchy has the following categories:

Level 1 - Quoted prices for identical instruments in active markets

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available and those prices represent actual and regularly occurring market transactions on an arm's length basis. The Fund does not adjust the quoted price for these instruments.

Level 2 - Valuation techniques using observable inputs

This category includes instruments valued using: quoted prices in active markets for similar instruments; quoted prices for similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.

Valuation techniques used for non-standardised financial instruments such as OTC derivatives, include the use of comparable recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, option pricing models and other valuation techniques commonly used by market participants making the maximum use of market inputs and relying as little as possible on entity determined inputs.

NOTES TO THE FINANCIAL STATEMENTS (continued)

For the financial period ended 31 January 2019

3. FINANCIAL INSTRUMENT AND RISKS (continued)

e) Valuation of financial instruments (continued)

Level 3 - Valuation techniques using significant unobservable inputs

This category includes all instruments where the valuation techniques used include inputs not based on market data and these inputs could have a significant impact on the instrument's valuation.

This category also includes instruments that are valued based on quoted prices for similar instruments where significant entity determined adjustments or assumptions are required to reflect differences between the instruments and instruments for which there is no active market.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement.

Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability. The determination of what constitutes 'observable' inputs requires significant judgement by the Manager. The Manager considers observable inputs to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

There were no level 3 securities held on the Funds with a fair value greater than 1% of the relevant Fund's NAV at the financial period ended 31 January 2019 or 31 July 2018.

4. OPERATING EXPENSES

The Company employs an "all in one" fee structure for its Funds, with each Fund paying all of its fees, operating costs and expenses (and its due proportion of any costs and expenses allocated to it) as a single flat fee (the TER). Where a Fund has multiple Share Classes, any fees, operating costs and expenses which are attributable to a particular Share Class (rather than the entire Fund) will be deducted from the assets notionally allocated by the Fund to that Share Class. The TER is calculated in accordance with the Committee of European Securities Regulators ("CESR") guidelines on the methodology for calculation of the ongoing charges figure in the KIID or the product page of the website at www.ishares.com.

The Manager is responsible for discharging all operational expenses, including but not limited to fees and expenses of the Directors, Investment Manager, Depositary, Administrator, Transfer Agent and Registrar from the amounts received by the Manager from the TER. Such operational expenses include regulatory and audit fees but exclude transaction costs and extraordinary legal costs.

In the event a Fund's costs and expenses in connection with the operation of the Fund exceed the stated TER, the Manager will discharge any excess amount out of its own assets.

For the financial period ended 31 January 2019

4. **OPERATING EXPENSES (continued)**

Management fees (inclusive of investment management fees)

The Manager is entitled to an annual fee at rates not exceeding those set out on the following table. These rates are the maximum fee rates as at 31 January 2019:

| Fund/Share Class* | TER(%) Currency hedged fund/share classes | TER(%) Unhedged fund/share classes |

* Where a Fund has multiple share classes, any fees, operating costs and expenses which are attributable to a particular share class (rather than the entire Fund) will be deducted from the assets notionally allocated by the Fund to that share class.

** This charge can be up to 1.00%. Any increase in this charge will be subject to prior shareholder approval. *** As this Share class launched within the past 12 months, the fees, operating costs and expenses used to calculate the TER have been annualised.

Whilst it is anticipated that the TER borne by a Fund or share class shall not exceed the amounts set out above during the life of the Fund or share class (respectively) such amounts may need to be increased. Any such increase will be subject to the prior shareholder approval of the relevant Fund or share class evidenced either by a majority vote at a meeting of shareholders or by a written resolution of all of the shareholders.

For the financial period ended 31 January 2019

4. **OPERATING EXPENSES (continued)**

Management fees (inclusive of investment management fees) (continued)

As disclosed, no commissions, discounts, brokerages or other special terms have been granted or are payable by the Company in connection with the issue or sale of any capital of the Company.

For the financial period ended 31 January 2019

5. DISTRIBUTION TO REDEEMABLE PARTICIPATING SHAREHOLDERS

The Company may declare and pay dividends on any distributing class of shares in the Company. In accordance with the prospectus, any dividend which has remained unclaimed for twelve years from the date of its declaration shall be forfeited and cease to remain owing by the Company to investors and become the property of the relevant Fund.

Distributions declared during the financial period were as follows:

| | Company | Total | iShares \$ Treasu UCITS I | | iShares Core I UCITS E | | iShares Core UCITS E | |
|--|---------------------|---------------------|------------------------------|-----------------------|---------------------------|----------------------|-------------------------|-----------------------|

| Total | (767) | 30 | 47 | - | 242 | 30 | (1,205) | - |

6. TAXATION

Below is an analysis of the tax charge for the financial period:

| | Financial period ended 31 January 2019 '000 | Financial period ended 31 January 2018 '000 |
|--|---|---|
| Current tax | | |
| Non-reclaimable overseas income withholding tax | (53,733) | (39,151) |
| Non-reclaimable overseas capital gains tax | (37) | (4) |
| Deferred tax | | |
| Provision for overseas capital gains tax payable | (800) | (977) |
| Total tax | (54,570) | (40,132) |

Irish tax

Under current law and practice, the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis it is not chargeable to Irish tax on its income or gains. However, Irish tax may arise on the occurrence of a "chargeable event". A chargeable event includes any distribution payments to shareholders or any encashment, redemption, cancellation or transfer of shares and the holding of shares at the end of each eight year period beginning with the acquisition of such shares.

iSHARES VII PLC

NOTES TO THE FINANCIAL STATEMENTS (continued)

For the financial period ended 31 January 2019

6. TAXATION (continued)

Irish tax (continued)

No Irish tax will arise on the Company in respect of chargeable events in respect of:

- A shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Company; or the Company has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and
- b) Certain exempted Irish tax resident shareholders who have provided the Company with the necessary signed annual declarations; and
- c) Any transaction (which might otherwise be a chargeable event) in relation to shares held in a recognised clearing system as designated by order of the Irish Revenue Commissioners (such as CREST) will not constitute a chargeable event. It is the current intention of the Directors that all the shares in the Company will be held in Crest or another recognised clearing system.

Overseas tax

Dividends, interest and capital gains (if any) received on investments made by the Company may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its shareholders.

For financial reporting purposes, and in accordance with FRS 104, the Company must recognise a provision for deferred tax payable arising from material timing differences between the taxation of unrealised gains in the financial statements and actual realisable taxable profits.

This change in Brazilian CGT has resulted in the recognition of a provision for deferred tax payable arising from material timing difference between the taxation of unrealised gains in the financial statements and actual realisable taxable profits as detailed on the iShares MSCI Brazil UCITS ETF USD (Acc) financial statements.

7. SHARE CAPITAL

The issued and fully paid redeemable participating share capital is at all times equal to the NAV of the Company. Redeemable participating shares are redeemable at the shareholders' option and are classified as financial liabilities.

Redeemable Participating Shares - issued and fully paid

| | No. of Shares |
|-----------------------|---------------|
| As at 31 January 2019 | 430,333,240 |
| As at 31 July 2018 | 375,032,300 |
| As at 31 January 2018 | 283,452,114 |

Authorised

The authorised share capital of the Company was €2 divided into 2 Subscriber Shares of a par value of €1.00 each and 1,000,000,000,000 participating shares of No Par Value ("NPV") initially designated as unclassified shares.

Subscriber shares

The 2 subscriber shares are currently in issue and are held by the Manager and nominees of the Manager at 31 January 2019 and 31 July 2018. They do not form part of the NAV of the Company. They are thus disclosed in the financial statements by way of this note only. In the opinion of the Directors this disclosure reflects the nature of the Company's investment business.

Voting Rights

The holders of the subscriber shares and redeemable participating shares shall, on a poll, be entitled to one vote per share.

For the financial period ended 31 January 2019

The Investment Manager has appointed BlackRock Asset Management North Asia Limited and BlackRock Asset Management Deutschland AG, as sub-investment managers to perform certain portfolio management functions in respect of the following Funds:

Fund

iShares Core EURO STOXX 50 UCITS ETF iShares Core FTSE 100 UCITS ETF GBP (Acc) iShares Core MSCI EMU UCITS ETF iShares Core MSCI Pacific ex-Japan UCITS ETF iShares Core S&P 500 UCITS ETF iShares Dow Jones Industrial Average UCITS ETF iShares FTSE MIB UCITS ETF EUR (Acc) iShares MSCI Brazil UCITS ETF USD (Acc) iShares MSCI Canada UCITS ETF iShares MSCI EM Asia UCITS ETF iShares MSCI EMU CHF Hedged UCITS ETF (Acc) iShares MSCI EMU Small Cap UCITS ETF iShares MSCI EMU USD Hedged UCITS ETF (Acc) iShares MSCI Japan UCITS ETF iShares MSCI Korea UCITS ETF USD (Acc) iShares MSCI Mexico Capped UCITS ETF iShares MSCI Russia ADR/GDR UCITS ETF iShares MSCI UK Small Cap UCITS ETF iShares MSCI UK UCITS ETF iShares MSCI USA Small Cap UCITS ETF iShares MSCI USA UCITS ETF iShares NASDAQ 100 UCITS ETF iShares Nikkei 225 UCITS ETF

Securities Lending

The total income earned from securities lending transactions is split between the relevant Fund and the Securities Lending Agent. The Funds which undertake securities lending transactions receive at least 62.5%, while the Securities Lending Agent receives up to 37.5% of such income, with all operational costs borne out of the Securities Lending Agent's share. Income earned during the financial period by the Funds from securities lending transactions is disclosed in the condensed income statement.

12. SUBSEQUENT EVENTS

The ex-date and pay date for distributions of the below Funds occurred post financial period end to date of signing.

| Fund | Distribution Amount ('000) |
|--|----------------------------|
| iShares \$ Treasury Bond 3-7yr UCITS ETF | \$564 |
| iShares Core MSCI EMU UCITS ETF | €783 |
| iShares Core S&P 500 UCITS ETF | \$6,457 |

Other than the above, there have been no events subsequent to the financial period end, which, in the opinion of the Directors of the Company, may have had an impact on the financial statements for the financial period ended 31 January 2019.

13. APPROVAL DATE

The financial statements were approved and authorised for issue by the Directors on 26 March 2019.

The CBI requires a Schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. At a minimum the largest 20 purchases and 20 sales must be given or all purchases and sales if less than 20. A full listing of the portfolio changes for the financial period is available, upon request, at no cost from the Administrator.

The CBI requires a Schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. At a minimum the largest 20 purchases and 20 sales must be given or all purchases and sales if less than 20. A full listing of the portfolio changes for the financial period is available, upon request, at no cost from the Administrator.

The Fund return figures are the aggregated net monthly returns and are based on the average published pricing NAV for the financial period under review. Due to accounting policy requirements under Irish accounting standards which apply to the financial statements, there may be slight differences between the NAV per share as recorded in the financial statements and the published pricing NAV per share. The returns are net of management fees.

Past performance may not necessarily be repeated and future performance may vary.

Disclosed in the table above are the performance returns for the primary share class for each Fund, which has been selected as a representative share class. Performance returns for other share classes are available at www.ishares.com.

Other regulatory disclosures (unaudited)

PEA Eligibility (Plan d'Epargne en Actions)

A PEA is a French equity savings plan intended to encourage French tax resident individuals to invest in European equities. PEA eligible Funds must invest on a permanent basis at least 75% of their assets in PEA eligible securities issued by companies (i) established in a Member State of the EU or in Iceland, Liechtenstein or Norway and (ii) subject to corporate income tax, or an equivalent tax.

Throughout the financial period, 1 August 2018 to 31 January 2019, the Funds listed below invested more than 75% of their total net assets in PEA eligible securities.

As at 31 January 2019, the below Funds had the following percentage of their total net assets invested in eligible PEA securities:

| Fund | % Invested in European PEA eligible shares |
|--------------------------------------|---|
| iShares Core EURO STOXX 50 UCITS ETF | 93.09% |
| iShares Core MSCI EMU UCITS ETF | 89.49% |

Transactions with connected parties

In accordance with the requirements of the CBI, the Manager shall ensure that any transactions carried out between the Funds and the Manager or Depositary to the Funds, the delegates or sub-delegates of the Manager or Depositary (excluding any non-group company sub-custodians appointed by a Depositary) and any associated or group company of the Manager, Depositary, delegate or sub-delegate ("Connected Parties") must be conducted at arm's length and in the best interests of the shareholders.

The Board of Directors of the Manager are satisfied that there are arrangements in place, as evidenced by written procedures, to ensure that the obligations set out above are applied to all transactions with Connected Parties and that transactions with Connected Parties entered into during the period complied with this obligation.

Leverage

The use of derivatives may expose Funds to a higher degree of risk. In particular, derivative contracts can be highly volatile, and the amount of initial margin is generally small relative to the size of the contract so that transactions may be leveraged in terms of market exposure.

A relatively small market movement may have a potentially larger impact on derivatives than on non-derivative instruments. Leveraged derivative positions can therefore increase Fund volatility.

SUPPLEMENTARY INFORMATION (unaudited)

Efficient portfolio management

The Company may, on behalf of each Fund and subject to the conditions and within the limits laid down by the CBI, employ techniques and instruments relating to transferable securities for efficient portfolio management purposes. Transactions for the purposes of efficient portfolio management may be undertaken with a view to achieving a reduction in risk, a reduction in costs or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the relevant Fund and the general provisions of the Directive. These techniques and instruments may include investments in FDI such as interest rate and bond futures (which may be used to manage interest rate risk), index futures (which may be used to manage cash flows on a short term basis), options (which may be used to achieve cost efficiencies, for example where the acquisition of the option is more cost effective than purchasing of the underlying asset), swaps (which may be used to manage currency risk) and investments in money market instruments and/or money market collective investment schemes. New techniques and instruments may be developed which may be suitable for use by the Company and the Company (subject to the Central Bank's requirements) may employ such techniques and instruments.

A Fund may enter into securities lending, repurchase and/or reverse repurchase agreements for the purposes of efficient portfolio management subject to the conditions and limits set out in the Central Bank UCITS Regulations and in accordance with the requirements of the Central Bank.

Securities Lending

The following table details the value of securities on loan as a proportion of the Funds' total lendable assets and NAV as at 31 January 2019. Total lendable assets represents the aggregate value of assets forming part of the Funds' securities lending programme. This excludes any assets held by the Funds that are not considered lendable due to any market, regulatory, investment or other restriction.

* The respective counterparty's country of establishment is detailed on page 243.

All securities on loan have an open maturity tenor as they are recallable or terminable on a daily basis.

Collateral

The Funds engage in activities which may require collateral to be provided to a counterparty ("collateral posted") or may hold collateral received ("collateral received") from a counterparty.

The following table provides an analysis by currency of the cash and non-cash collateral received by way of title transfer collateral arrangement by the Funds, in respect of securities lending transactions, as at 31 January 2019.

| Currency | Non-cash Collateral received | Currency | Non-cash Collateral received |

The Funds are the legal owner of inbound collateral and can sell the assets and withhold the cash in the case of default. All cash received or posted as collateral has an open maturity tenor as it's not subject to a contractual maturity date.

Non-cash collateral received by way of title transfer collateral arrangement in relation to securities lending transactions cannot be sold, re-invested or pledged.

SUPPLEMENTARY INFORMATION (unaudited) (continued)

Collateral (continued)

The following table provides an analysis of the type, quality and maturity tenor of non-cash collateral received and posted by the Funds by way of title transfer collateral arrangement in respect of securities lending transactions as at 31 January 2019.

| | | | | Maturity tenor | | | | |

No callateral had a maturity tenor of 1 day.

Investment grade securities are those issued by an entity with a minimum investment grade credit rating from at least one globally recognised credit rating agency; Standard & Poor's, Moody's or Fitch.

A recognised equity index contains at least 20 equities where no single equity represents more than 20% of the total index and no five equities combined represent more than 60% of the total index.

The maturity tenor analysis for fixed income securities received or posted as collateral is based on the respective contractual maturity date, while for equity securities, ETFs and money market funds received or posted as collateral are presented as open transactions as they are not subject to a contractual maturity date.

As at 31 January 2019, all non-cash collateral received by the Funds in respect of securities lending transactions is held by the Funds' Depositary (or through its delegates).

The following table lists the ten largest issuers by value of non-cash collateral received by the Funds by way of title transfer collateral arrangement across securities lending transactions as at 31 January 2019.

GLOSSARY* (unaudited)

Futures contracts

A futures contract is a contract, traded on an exchange, to buy or sell a certain underlying instrument at a certain date in the future, at a specified price. They are entered into for the purposes of gaining exposure to or hedging against changes in interest rates, changes in the value of securities or foreign currencies. Depending on the terms of a particular contract, futures can be settled either through physical delivery of the underlying instrument or by payment of a cash amount on the settlement date. Upon entering into the contract the Fund is required to deposit initial margin with the broker in the form of cash or securities in an amount that varies depending on the contracts size and risk profile. During the life of the contract the Fund agrees to pay or receive an amount of cash equal to the daily fluctuation in the value of the contract at the time it was open and the value at the time it was closed.

Forward currency contracts

A forward currency contract is an agreement between two parties to buy or sell a currency at a set exchange rate at a certain date in the future. The Fund enters into forward currency contracts as an economic hedge against transactions or financial instruments and to obtain exposure to foreign currencies. Non-deliverable forward foreign currency exchange contracts are settled with the counterparty in US Dollar without the delivery of the foreign currency.

The unrealised gain or loss on open forward currency contracts is calculated by reference to the difference between the contracted rate and the rate to close out the contract as at the financial period end date.

Realised gains or losses are recognised on the maturity of a contract as the difference between the rate that the contract was entered into and the closing spot rate at the settlement date of the contract.

Redeemable participating shares

The redeemable participating shares can be redeemed for cash equal to a proportionate share of the NAV calculated in accordance with the Company's prospectus. The redeemable participating share is valued at the redemption amount that is payable at the condensed balance sheet date if the shareholder exercised their right to put the shares back to the Company.

The fair value of the financial liabilities for the redeemable participating shares is the redemption amount per share, calculated as the NAV per share less any associated duties and charges and any redemption fee which is payable on the shares redeemed. Any potential duties and charges are at the discretion of the Board of Directors.

Any distributions on these shares are recognised in the Income statement as finance costs.

Transaction costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability.

An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument. When a financial asset or financial liability is recognised initially, it is measured at its fair value through profit or loss, plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Equalisation on Distributions

Equalisation arrangements are applied in the case of shares in the Company. These arrangements are intended to ensure that the income distribution per share is not affected by changes in the number of shares in issue during the financial period.

To ensure that each shareholder receives the same rate of distribution per share, the buying price of each share contains an amount called equalisation. This is equivalent to the net of distributable income less expenses, accrued in the Company at the time of purchase/sale.

As part of the distribution payment, the average amount of this equalisation is returned to shareholders who subscribed to or redeemed from the Company during the financial period. The equalisation element of the distribution is treated as a repayment of capital.

*The Glossary is an integral part of the notes to the financial statements.

DISCLAIMERS (unaudited)

Regulatory Information

BlackRock Advisors (UK) Limited, which is authorised and regulated by the FCA, registered office at 12 Throgmorton Avenue, London, EC2N 2DL, England, Tel +44 (0)20 7743 3000. For your protection, calls are usually recorded. iShares plc, iShares II plc, iShares IV plc, iShares V plc, iShares VI plc and iShares VII plc (together 'the Companies') are open-ended investment companies with variable capital having segregated liability between their funds organised under the laws of Ireland and authorised by the Central Bank of Ireland.

Further information about the Fund and the Share Class, such as details of the key underlying investments of the Share Class and share prices, is available on the iShares website at www.ishares.com or by calling +44 (0)845 357 7000 or from your broker or financial adviser. The indicative intra-day NAV of the Share Class is available at http://deutsche-boerse.com and/or http://www.reuters.com. A UCITS ETF's units / shares that have been acquired on the secondary market cannot usually be sold directly back to the UCITS ETF itself. Investors who are not Authorised Participants must buy and sell shares on a secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees and additional taxes in doing so. In addition, as the market price at which the Shares are traded on the secondary market may differ from the NAV per Share, investors may pay more than the then current NAV per Share when buying shares and may receive less than the current NAV per Share when selling them.

For investors in the UK

Most of the protections provided by the UK regulatory system do not apply to the operation of the Companies, and compensation will not be available under the UK Financial Services Compensation Scheme on its default. The Companies are recognised schemes for the purposes of the Financial Services and Markets Act 2000. Any decision to invest must be based solely on the information contained in the Company's Prospectus, KIID and the latest half-yearly report and unaudited accounts and/or annual report and audited accounts. Investors should read the fund specific risks in the KIID and the Company's Prospectus.

Restricted Investors

This document is not, and under no circumstances is to be construed as an advertisement or any other step in furtherance of a public offering of shares in the United States or Canada. This document is not aimed at persons who are resident in the United States, Canada or any province or territory thereof, where the companies/securities are not authorised or registered for distribution and where no prospectus has been filed with any securities commission or regulatory authority. The companies/securities may not be acquired or owned by, or acquired with the assets of, an Employee Retirement Income Security Act Plan.

Risk Warnings

Investment in the products mentioned in this document may not be suitable for all investors. Past performance is not a reliable indicator of current or future results and should not be the sole factor of consideration when selecting a product or strategy. Capital at risk. The value of investments and the income from them can fall as well as rise and are not guaranteed. You may not get back the amount originally invested. The value of investments involving exposure to foreign currencies can be affected by exchange rate movements. We remind you that the levels and bases of, and reliefs from, taxation can change.

BlackRock has not considered the suitability of this investment against your individual needs and risk tolerance. The data displayed provides summary information. Investment should be made on the basis of the relevant Prospectus which is available from the manager.

In respect of the products mentioned, this document is intended for information purposes only and does not constitute investment advice or an offer to sell or a solicitation of an offer to buy the securities described within. This document may not be distributed without authorisation from BlackRock Advisors (UK) Limited.
